Office Action: 6 File Paper Number: 18

DETAILED ACTION

1. The amendment filed on June 9, 2003 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Rutkowski et al (the US Patent No. 6,198,442, of record).

The Rutkowski et al reference teaches in the figure 5 an antenna apparatus for receiving or transmitting radio waves at two different frequencies, comprising: a pair of antenna elements 53a,53b having different resonant frequencies, and a pair of phase shift circuits 55a,55b for shifting phase of the radio waves (col. 6, lines 24-31), wherein feed points of the pair of antenna elements are connected to a radio circuit via the pair of phase shift circuits, respectively (see the figure 5). The antennas 53a,53b are electrically

connected in parallel (figures 5-7). Each antenna is operable to receive or transmit the radio waves at a different frequency (col. 5, lines 7-13). One of the phase shift circuits which are coupled to the one of the antenna elements shifts phase of the radio waves so as to increase an impedance of the one of the antenna elements at the resonance frequency of the other one of the antenna elements (col. 6, lines 11-23). The phase shift circuit comprises a lumped circuit 55a,55b. The phase shift circuit comprises a distributed constant circuit (col. 6, lines 6-31).

Response to Arguments

4. Applicant's arguments filed December 26, 2002 have been fully considered but they are not persuasive.

In response to applicant's argument that Rutkowski does not teach antennas having different resonant frequencies which are relatively proximate to each other, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA

Application Serial Number: 09/814,264

Office Action: 6

Art Unit: 2821 File Paper Number: 18

1963).

Since Rutkowski et al do show all claimed structure, including the antennas having different resonant frequencies, the 102 rejection is proper.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Correspondence

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Primary Examiner Hoanganh Le whose telephone number is (703) 308-4921.

Application Serial Number: 09/814,264 Art Unit: 2821
Office Action: 6 File Paper Number: 18

7. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center receptionist whose telephone number is (703) 308-0956.

8. Papers related to Technology Center 2800 applications only may be submitted to Technology Center 2800 by facsimile transmission. Any transmission not to be considered an official response must be clearly marked "DRAFT". The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Technology Center Fax Center number is (703) 308-7722 or (703) 308-7724.
